Max Neo Home - Grespania

Text description provided by the architects. The SF residence was designed on a plot of 1,200 m² for a family formed by a couple and a daughter. The owners asked the office for a single-storey house whose rooms could enjoy the huge preservation area of Granja Viana region in the city of Cotia-SP. The clients were worried that modern homes could not be welcoming, and asked for a building with countryside aspects.

Another desire of the residents was to enjoy the landscape in a single-storey house with the largest garden area possible, which was the major challenge of the project, as the land had a slope of 10 meters. The building was set up at a high elevation - seven meters from the street level, which generated a large prop wall at the front of the plot, but consequently we managed to create a large

The house has four suites. One of which, that today is the owner's office, faces the recreation area and forest. Two identical suites are in the central body of the house (one of the couple's daughter and another for guests) and provide a visual for the lateral garden. The master suite faces the back

During the work, when it was possible to climb on the roof slab, and the view to the woods was even more beautiful. It was inevitable to create a rooftop with ground fire to enjoy the view from another angle.
